Software Engineer with experience developing backend systems, database applications, and internal tools using Java, Python, and C. Earned an M.S. in Computer Science with additional experience in software research, technical instruction, and full-stack development.

SKILLS

Languages: Java, Python, C/C++, C#, JavaScript, SQL, HTML/CSS
Technologies: Relational Databases, Django, Git, Unix/Linux, Visual Studio
Game Development: Unity, Unreal Engine
Additional: Technical communication, mentoring, code review

EDUCATION

Clemson University – Master of Science in Computer Science
Graduated May 2023 – Clemson, SC

Appalachian State University – Bachelor of Science in Computer Science
Graduated Summa Cum Laude May 2019 – Boone, NC

Wake Tech Community College – Associate of Applied Science in Simulation & Game Development
Graduated December 2016 – Raleigh, NC

EXPERIENCE

Software Developer
Integrated Support Systems – Seneca, SC | Jan 2023 – October 2026

- Develop and maintain database management software for aerospace industry clients.
- Design and implement backend features in Java and C to improve system performance, reliability, and integration across multiple platforms.
- Analyze requirements, implement new functionality, and support long-term maintenance of existing systems.
- Built internal workflow tools using Python and Django to automate processes and improve team efficiency.

Graduate Teaching Assistant
Clemson University – Clemson, SC | Aug 2019 – Dec 2022

- Instructed undergraduate computer science courses and laboratory sections covering data structures, systems programming, and software development concepts.
- Mentored students through debugging, algorithm design, and software development projects while contributing to course materials and assignments.

Undergraduate Research Assistant
East Carolina University – Greenville, NC | May 2018 – Aug 2018

- Contributed to NSF-funded research on conversational software systems and natural language interaction.

Python Curriculum Developer
Gear Up Initiative – Boone, NC | Aug 2017 – May 2018

- Developed Python programming curriculum for K-12 outreach programs, translating technical concepts into accessible learning materials.

Lead Programmer
Shiny Side Games – Raleigh, NC | May 2016 – Aug 2017

- Led development of C# game projects in Unity and Unreal Engine, implementing core gameplay systems and coordinating development tasks across a small team.

VOLUNTEER EXPERIENCE

Trap-Neuter-Return Volunteer
Miss Dixie's Kitten Rescue — Seneca, SC | January 2020 – Present

- Participate in local cat rescue and trap-neuter-return (TNR) efforts.
- Trap, transport, and return cats as part of TNR efforts.
